## HAD TO LEAVE HER POSITION ACCOUNT OF HEALTH

Mrs. Emma Howard Jennings, Fairfield Avenue, is a Strong Indorser of Herbal Lax-a-Tone.

Among the many kind words said for Lax-a-Tone none are more sincere and heartfelt than Mrs. Howard. This lady is 76 years of age and was employed by Warner Bros. for 10 years and had to leave them on account of poor health. She says:

MRS. EMMA HOWARD

I have suffered with severe stomach trouble and was invalid from rheumatism, could hardly walk around, could do no work at all and suffered severe pains. I tried every means that I could think of to recover my health. I am pleased to state that Herbal Lax-a-Tone has put me on the road to health. I feel better than I have felt in many years and earnestly indorse this remedy to anyone in need of a remedy that does as it advertises.

Lax-a-Tone is for sale at Hartigan's drug stores, 31 Fairfield Avenue and Congress and Main streets.—Adv.

This sum is to be increased to 10,000,000 roubles as speedily as possible. The furthering of commercial relations between Holland and Russia is to be the first object of the bank's endeavors. J. ## BRITISH HELMET GREAT FACTOR IN PRESERVING LIFE

Read-Piece Responsible for  
Minimizing Danger of  
Cranial Wounds.

London, May 18.—The value of the helmets which are now being supplied to the British troops at the front is indicated in an article in the current issue of the British Medical Journal which says that in a big fight where the Britishers were wearing the new helmets the number of penetrating gunshot wounds of the head was equal to less than one-half per cent. and the total number of fractures of the skull was under one per cent. of all injuries. Head wounds have been set down, upon the experience of recent wars, as accounting for fifteen per cent. of all casualties, and the latest data show that, in trench fights at least, the percentage is as high as 25.

"The British helmet," the Journal explains, "protects the side and back of the neck and the temples and the upper part of the face as well, of course, as the top and sides of the head. It has also a smooth round top. It stands away from the head about one-third of an inch all around, the weight being borne by a padded leather band fixed to the inner side of the surrounding steel by a series of india rubber buffers, each about the thickness of a lead pencil, and about one inch long. This detail of construction constitutes perhaps the most important difference between the British and French helmets. The buffers are capable of diffusing and neutralizing the force of a blow, which, falling on the closely fitted French helmet would be conducted direct to the brain pan."

## MAY CONDEMN SHACK RAIDED LAST NIGHT

As a result of a raid made last night upon a small shack on the mudflats at the extreme end of Stella street extension when one woman and several men were arrested for intoxication and vagrancy, the police will make an effort to raze a resort that they claim is both offensive and insanitary. The vagrants caught in the raid were given light fines and jail sentences today and the board of health was asked to condemn the property.
